SUMMARY

INTRODUCTION

Bitcoin (BTC) is a decentralized digital currency that can be transferred on the peer-to-peer bitcoin network. **Bitcoin** was created in 2009 that use peer-to-peer technology to facilitate instant payments. Bitcoin transactions are verified by network nodes through cryptography and recorded in a public distributed ledger called a blockchain. Bitcoin was traded less than **$0.01** in **2010** now it is the No:1 cryptocurrency in the world. Everyone of have willing to make a minimum investment in this future technology.

Blockchain technology is a structure that stores transactional records, also known as the block, of the public in several databases, known as the "chain," in a network connected through peer-to-peer nodes. Typically, this storage is referred to as a 'digital ledger.

A wants to transfer money to B

Transaction is represented as a Block.

Block is broadcasted to everyone in the network

B recieves money from A

Block is then added to the chain, providing an indelible and transparentrecord of transaction.

Approved as valid from everyone in the network

How Cryptocurrency transaction works

UCCASH Team

Easy to use Platform

> ➤ Most of the crypto exchange platforms are designed for traders with a lot of features which is difficult for beginner users.
> UCCASH platform aims to build a simple user interface of exchange to cater all types of users.

> ➤ UCCASH an easy to use platform, new traders can get their hands on crypto currency trading and intern becoming the core users of our platform.

Secured Platform

> ➤ Blockchain technology has evolved to solve the problems from internet technology like authenticity and security in distributed nature. Majority of exchange platforms are centralized, leading to security threats from hackers.

> ➤ UCCASH aims to build a fully decentralized application, making use of the blockchain technology to the fullest. With distributed nature hackers can't pose any threat to individual user assets.

Multi Crypto Wallet

➤ Cryptocurrencies are in numbers and are new every day Tokens are initiated. Crypto enthusiasts want to buy and sell, they want to Monitor on single platform.

➤ Our UCCASH exchange platform will provide users with a multi crypto wallet system, a single application for world crypto currencies.

High Crypto Liquidity

➤ Every individual exchange platform finds it difficult to provide high liquidity when users try to buy crypto at high fluctuation time.
The demand for growing crypto currencies are exponential which leads to unstable pricing of assets.

➤ UCCASH will be integrating with all the major DEX protocols To provide Highest liquidity for end users. Our own pool of liquidity will be additional benefits for our users during high demand.

24/7 Support (Multi Language)

➤ Mostly crypto community members are diverse in nature. Often customers are unable to resolve issues due to language restrictions enforced by the support team.

➤ UCCASH Providing a Multi language and the round clock support to International customers would be priority offering.

CORE FEATURES OF UCCASH

EXCHANGE UTILITY COIN

➢ UCC token is the heart of UCCASH Exchange, The primary
   use of exchange tokens is to raise funding for the platform.
 This, in turn, helps the exchange to maintain and improve its
 infrastructure. However, exchange tokens also provide plenty
 of utility to users, giving them access to voting rights,
 discounted transaction fees, exclusive coin offerings, and
 more, UCC is the main things all needs in UCCASH Exchange

➢ Having utility tokens allow you decentralized storage.
 These tokens provide the exchange value for the services
 they give. also improves the user experience by giving rewards
 for particular things. Utility tokens act as currency in the
 blockchain

SWAPING BETWEEN CRYPTOS

➢ UCCASH providing our own UCSWAP Decentralized exchange,
   Anyone crypto can be converted to any crypto of your choice.
   All the listing of cryptos in exchange goes through a review
   process by our community of members before listing.

➢ UCCASH use multiple protocols (Pancakeswap, PoocoinApp
   and Ucswap etc..) To provide high liquidity in our exchange.

➢ Crypto Pairs type:
    ❖ TRC20 Pairs
    ❖ ERC20 Pairs
    ❖ BEP20 Pairs
    ❖ UCCASH Blockchain Pairs (Soon)
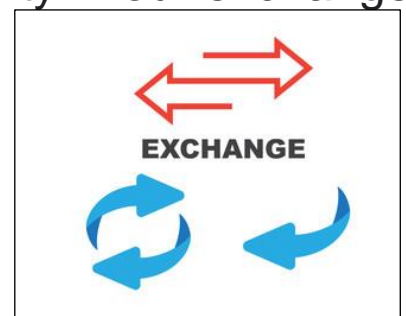

UCCASH

SPOT TRADING BETWEEN CRYPTOS

➢ UCCASH offers FIAT currency to crypto pairs enabling new buyers to buy initial crypto before they begin to trade for other cryptos.

➢ All our spot purchases are offered for stable coins, UCCASH enabling our Liquidity members to earn from transaction fees.

➢ **Pairs type:**

❖ **INR Pairs**
❖ **USDT Pairs**
❖ **UCC Pairs**

PEER 2 PEER

➢ Every user of UCCASH is enabled by default to put out a listing of their choice to buy and sell crypto.
If the trade is confirmed by buyer / seller, respective client bank details are provided to initiate a transaction. Our platform will act as an escrow agent to complete these transactions and resolve any issue.

➢ Prime users are priority clients who are enabled to use thesefeatures, where minimum buy and sell value are pre-defined. Also ensuring less time to complete transactions for both buyer and seller.

➢ Anyone can become a priority user by holding sufficient UCC token and good track record from earlier transactions will be taken into consideration before converting to a prime user.

UCCASH BLOCKCHAIN (SOON)

Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system.
A blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the blockchain.
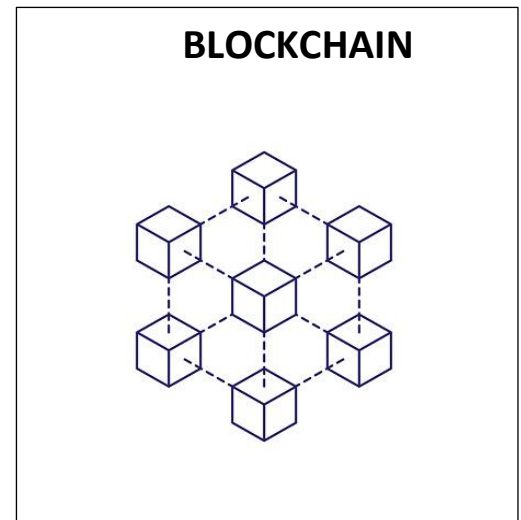

BLOCKCHAIN

On blockchain, the goal of a smart contract is to *simplify business and trade between both anonymous and identifie parties, sometimes without the need for a middleman*. A smart contract scales down on formality and costs associated with traditional methods, without compromising on authenticity and credibility.

To this end, smart contracts are a helpful innovation accompanying many blockchain activities, helping end-users benefit by lowering fees, hastening transaction speeds, ensuring performance, and increasing protections for associated parties entering into an agreement.

So we UCCASH focused to create our own blockchain with smart contract for high transection speed with very low cost.

UCCASH CRYPTO WALLET (SOON)

- A Crypto wallet is a software / hardware application to store your cryptocurrency. However, cryptocurrencies do not exist in any physical shape or form. Crypto can't technically be stored anywhere except coin wallets. This type of software is easy to use while also being secure and fast.

- Crypto wallets keep your private keys – the passwords that give You access to your cryptocurrencies – safe and accessible, allowing you to send and receive cryptocurrencies like Bitcoin and Ethereum etc...

- UCCASH will provide a hot and cold crypto storage wallet that can sell, buy, transfer and store digital currencies. You can store all your NFTs and crypto coins in one place in UCCASH Wallet.

- UCCASH will provide a super-safe security system that ensures your coins are safe. It uses two-factor authentication (2FA) verification, device management, addresses whitelisting, and cold storage. 95% of coins will stored in cold storage.

  - **Manage** all your digital assets in one secure place
  - **Control** your own private keys
  - **Send and receive** cryptocurrency to and from anywhere in the world
  - **Interact** with usernames rather than long, hexadecimal "public key" addresses
  - **Browse** dapps (decentralized finance apps)
 - **Shop** at stores that accept cryptocurrency

NFT & METAVERSE MARKET PLACE (SOON)
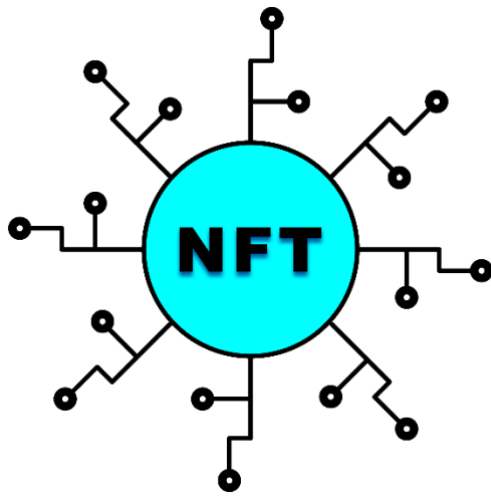

- UCCASH focused to create the real NFT & Metaverse world through From Our UCCASH Blockchain.
- A Non-Fungible Token is a financial security consisting of

  digital data stored in a blockchain, a form of distributed ledger.

  The ownership of an NFT is recorded in the blockchain, and

  can be transferred by the owner, allowing NFTs to be sold and

  traded.

- NFTs serve a key concept in the Metaverse ecosystem, **allowing people to own virtual goods in the form of Real-Estate, Items like cars, boats or even accessories and paintings** - all possible through NFTs

- **The metaverse.** This is a theoretical concept of a digital 3-D world that you enter via a virtual reality headset. In this virtual world, you have a "body" (avatar) that you can customize, a home to fill with the stuff you like and hundreds of spaces to visit. You can interact with other users, do work, play games and basically perform most of the activities that you do in everyday life.

SECURITY MANAGEMENT

There are two ways to ensure security for exchange assets
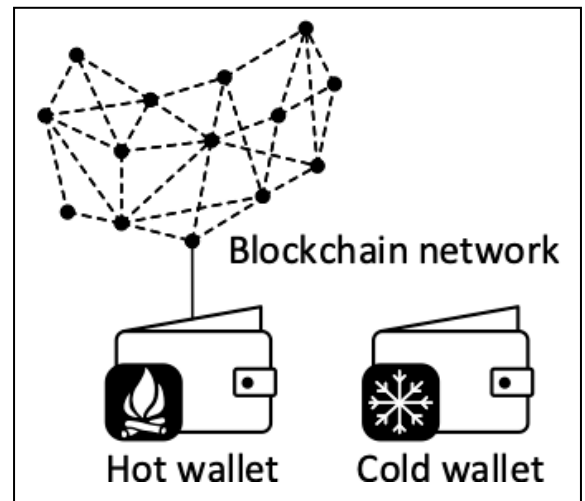

- ## Private key managed by Users

  UCCASH exchange enables users to download their private key and store it securely in their devices.
  When transactions are performed provide a private key which will be used to access the wallet from blockchain directly which is distributed

- ## Hot wallet and Cold wallet

  Assets are distributed between cold and hot wallet depending on the user traffic for trading.
  A party maintains keys in 2 wallets. One of the wallets, referred to as the *hot wallet*, stores frequently used keys and is connected to the Internet. Another wallet, referred to as the cold wallet, stores infrequently used keys and is kept offline.

UCCASH ACADEMY

Join us for your financial freedom

VISSION

We Connecting the best crypto community and serving as a bridge between the community and high potential projects is our mission. Our goal is to make UCCASH the Universe number 1 crypto community.

MISSION

Most of the Leading crypto communities only share Knowledge but have no mechanism to share rewards within the community.

But UCCASH Organization strives to create a global community that shares both the knowledge and creates an opportunity for to help peoples live a life of economic independence on their financial

UCCASH (UCC TOKEN)

A total UCC of **369,000,000** tokens will be created on the BEP20 network with Binance Smart chain called as UCC. Our tokens are sold through private pre-sale and public sale to raise funds for developing crypto currency exchange and building the community. UCC Tokens can be used to pay various fees within the UCCASH Exchange platform.

As the usage of UCC token grows and valuation of the token will increase automatically.

TOKEN INFORMATION

Token name : **UNIVERSE CRYPTO CASH**

Contract name: UCCASH

Token symbol : UCC

Token decimal : 18

Token address : 0xe49D8758D9DF1B91Ec5A48B37675d08E664d9Df0

**Token supply** : **369000000 UCC**

Network : **BEP-20**

Blockchain : **Binance Smart Chain (BSC)**

PRIVATE PRE-SALE PROCESS

UCCASH plan to sell 20% UCC **(73800000 UCC)** of total distribution through private pre-sale. we adopted through affiliate marketing technique to create brand awareness to build initial community for our product.

We believe word of mouth by existing customers will create a good understanding about products & services of UCCASH.

We also believe that most of the initial customers are beginners, who would require training and understanding crypto currency before they can trade.

PUBLIC SALE PROCESS

After complete Public sale straight in to exchange

Public sale distribution Date: 30th August 2022

Public Sale Price 1 UCC = 0.02 BUSD

Public Sale UCC Distribution is 73800000 UCC from the 20% of Total token supply

- ❖ **Public sale price: 1 BNB = 15,000 UCC**
- ❖ Payment accepted: BNB only
- ❖ Purchase via: self-Drop through DAPP with Trust wallet & Meta mask (Investor will interact with our contract address in Binance Smart Chain and Receive token Automatically)
- ❖ **Soft Cap: 3000 BNB**
- ❖ **Hard Cap: 5000 BNB**

All raise funds will be utilized for projects, liquidity, listing fees on the exchange and expand the community.

ROUND SALE

❖ **Public Sale phase 1 - 18450000 UCC Selling Price 0.02 BUSD per UCC**

❖ **Public Sale phase 2 - 18450000 UCC Selling Price 0.04 BUSD per UCC**

❖ **Public sale phase 3 - 18450000 UCC Selling Price 0.06 BUSD per UCC**

❖ **Public sale phase 4 - 18450000 UCC Selling Price 0.08 BUSD per UCC**

Public sale Referral reward: 10% UCC token per each referral

You receive your bonus token instantly in your wallet

✓ **Minimum purchase: 0.01 BNB**

✓ **Maximum purchase: 10 BNB**

After complete the token distribution at Listing Price 1 UCC = 0.20 BUSD

VESTING PLAN

25% of the foundation team and 10% of Angel investors will be vested for a period of 3 years. Members cannot sell these tokens in any exchange till the vested period expires, after that token can be sold only 5% every quarter

UCC TOKEN EVALUATION

Token holders are priority users of UCCASH exchange. Priority users are offered discounts in transactions and quick turnaround time for transactions in P2P.

Annually sum % of UCC tokens will be purchased in the market by UCCASH exchange.

Sum major % tokens of total supply will be purchased and burnt to create a demand for UCC token.
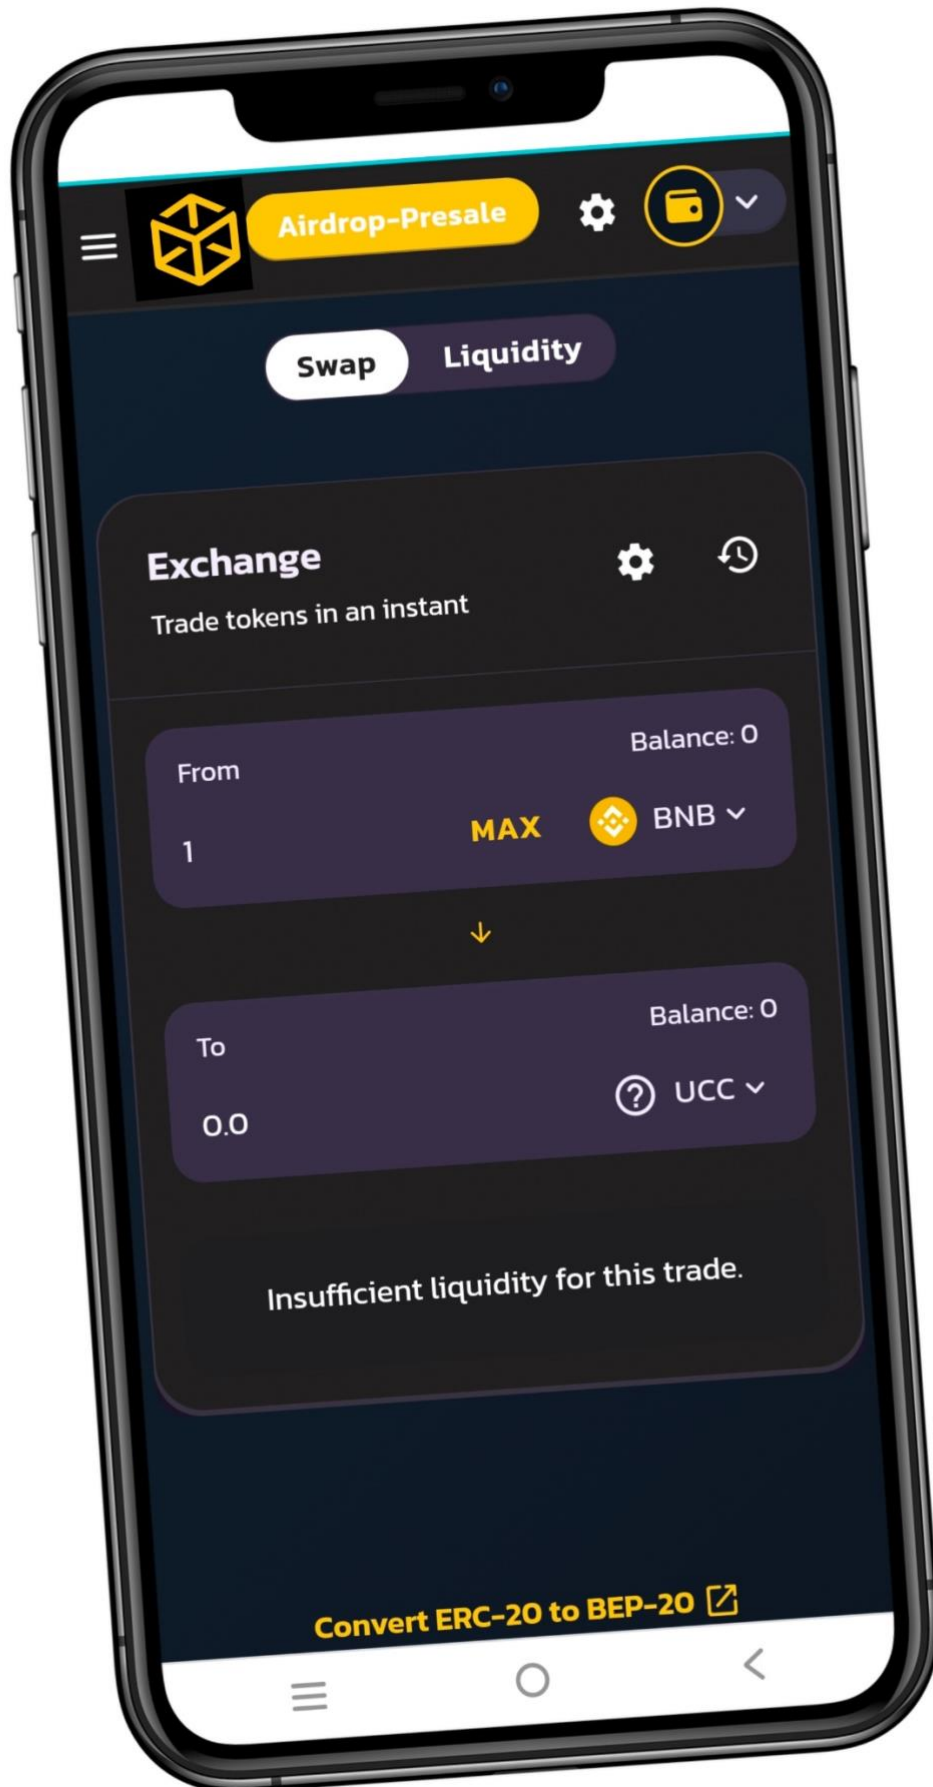

Priority users benefits:-

- o **P2P exchange trading fee.**
- o **Free training sessions for newbies.**
- o **Discounts on SPOT purchase fee.**
- o **Withdrawal fees are discounted.**
- o **Any other fees.**

UCCASH will be engaged continuously in the process of creating a better product.

Our academy which is another vertical of UCCASH platform Is involved in training & blockchain developers and building a better ecosystem for the crypto currency. With extensive growth of prime users and strong community,

demand for UCC token will eventually increase leading to a positive valuation.

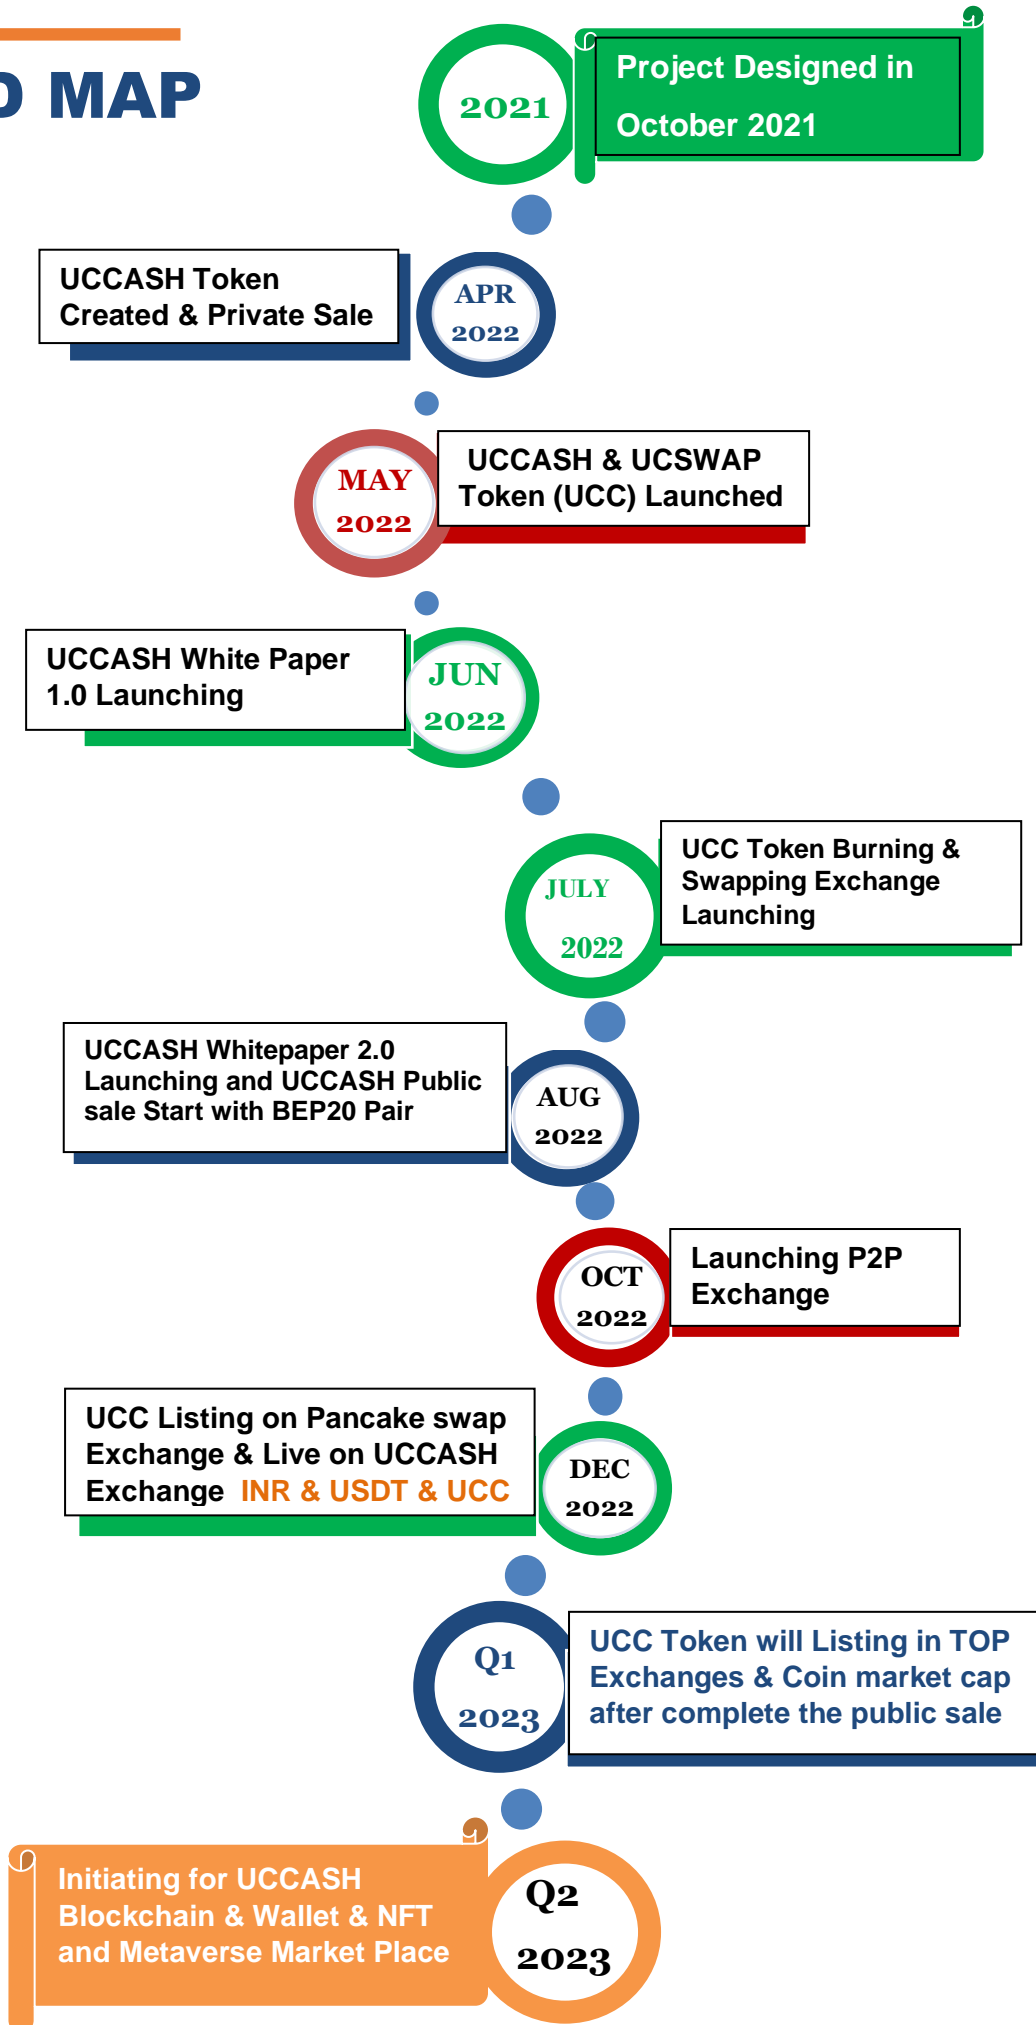

WORK IN PROGRESS

ROAD MAP

2021 — Project Designed in October 2021

APR 2022 — UCCASH Token Created & Private Sale

MAY 2022 — UCCASH & UCSWAP Token (UCC) Launched

JUN 2022 — UCCASH White Paper 1.0 Launching

JULY 2022 — UCC Token Burning & Swapping Exchange Launching

AUG 2022 — UCCASH Whitepaper 2.0 Launching and UCCASH Public sale Start with BEP20 Pair

OCT 2022 — Launching P2P Exchange

DEC 2022 — UCC Listing on Pancake swap Exchange & Live on UCCASH Exchange INR & USDT & UCC

Q1 2023 — UCC Token will Listing in TOP Exchanges & Coin market cap after complete the public sale

Q2 2023 — Initiating for UCCASH Blockchain & Wallet & NFT and Metaverse Market Place

UCCASH

Future is very bright for crypto currencies. It's speculated that in the next 2 Decades crypto currencies will become the de facto standard for monetary transfer. With Bitcoin listed in the NASDAQ exchange show us, this technology is here to stay and revolutionize.

EVOLUTION OF INDUSTRY

- Anyone new technology adoption will disrupt core industries and bring change.
  During this evolution of blockchain technology banking industries will have to overhaul itself and may sometimes put some restrictions to control the growth for staged adoption.

GOVERNMENT POLICIES

- As banking and financial institutions look to adopt this technology, government policies from country to country may vary. In the long term, the government will have to pave the way for this technology and the future for blockchain seems brighter for early adopters.
